Subject: regulation #2777 Department of Agriculture 2-160: Milk Sanitation.

Message:

My name is Carly Ptak, I am a raw milk consumer and I respectfully request that you reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation. I am proud to support real farmers that are real people and to drink real milk. I do not need protection from you or your regulations. I see the cows and the farmer and that is my protection. The same goes with the local markets and the local store. If I find them unsatisfactory then I will not buy from them. That is message enough. Your regulations do nothing but enhance the rights of unhealthy corporations to sell their disgusting and unhealthy homogenized products. All the recent egg and other poisonings should show you very clearly that the policing needs to be done at the level where large corporations are producing goods for profit alone. Small farmers have enough to deal with already, please leave them alone. Please help me maintain my rights as a citizen of this country to freely choose the food I eat. Vote against proposal 2-160. Again, I view the proposed regulation as excessive, and in some cases onerous and unnecessary. These flaws warrant that the proposed regulation be rejected. Thank your for your time, Carly Ptak
