Subject: New Raw Milk Regulations

Hello,

Please do NOT add requirements for building additional rooms in order to legally sell raw milk, cut and wrap cheese, etc. Perhaps more education and/or more inspections on current permit holders would be in everyone's best interest. The small farmer is the only person being hurt by these proposed regulations. The big businesses will continue to win and continue to produce sub-standard "food" compared to the small farmer who is so close to their product. Please reconsider these proposed regulations and instead, concentrate on education.

Thank you.
