Subject: Raw Milk Regulations

Message:

Dear Sirs, I am a raw milk consumer and I respectfully request that you reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation. Although some regulations are necessary, the regulation could be much simpler if there were performance standards, requiring that the end product achieves a desired result. That would result in the State's role being to test for compliance. Again, I view the proposed regulation as excessive, and in some cases onerous and unnecessary. These flaws warrant that the proposed regulation be rejected. Where we best need government involvement is where the suppliers or markets are no longer our neighbors but rather corporations created by the State. Food safety is not size neutral. Larger operations are more complex, problems have much more far-reaching impacts and we have no direct meaningful recourse if there is a problem. The regulation needs to mainly focus on those operations. Thank you
