Subject: Please reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation

My name is Erika Peterson and I am a raw milk consumer. I respectfully request that you reject the proposed new raw milk regulation. This regulation is burdensome to small producers and unnecessary where consumers have a direct, personal relationship with the farmer. Instead of a procedure-based regulation, please consider a performance-based regulation in which milk quality could be directly assessed, leaving the method of compliance up to the farmer.

Thank you,

Erika Peterson
