To whom it may concern:

I want to register my thoughts on the policies to be considered involving raw milk. I feel Pennsylvania is one of the few states where one can buy a pure product untouched by processing, as was intended by nature. Any burden that is placed on small dairy farms will take those rights away, as farmers will not be able to profit from this industry. I believe one of our rights is that of access to fresh food direct from the farmer. Please do not rush into any regulation without the proper amount of time. As the world becomes more dependent on processed food, food becomes less healthy and less under the control of the people who consume it. Do not let this happen in our Commonwealth.

Thank you
