**Subject:** Proposed regulation #2777, Dept. of Agriculture 2-160: Milk Sanitation

**Message:**

We are senior citizens residing in Delaware County who have been consuming raw milk and related products from Pennsylvania small farmers for six years. These foods are a core part of our daily diet, and we are very grateful for access to them. We write to urge you to reject the proposed regulation. Our farmers work hard to provide us with good, safe food, and we do what we can to help them continue to do what is vital to us. We strongly believe that they should not be encumbered with further, onerous state regulation, when they are already doing all they can. Please DO NOT place such burdens on the local, small farmers as to put them out of business. We need them, the state needs them. We are happy for you to police the larger corporations--they need it; but these small, local family operations do an excellent job of being safe and accountable to their families and their customers. We urge you not to hinder them (or us) in their efforts to provide us with quality food products. Sincerely, George & Christine Graf (610)521-1781
