Dear Commissioners,

Please vote to disapprove the subject regulation. My Pennsylvania family, including my elderly Aunt, are proud that their state is a model dairy producer. When I visit them, I am always impressed at how really good-tasting dairy products are, and at the neatness and cleanliness of the small, local producers' facilities. I don't see any way that the proposed regulation will be a positive thing. It seems to only add requirements for policing suppliers who are clearly very proud of their own self-regulation.

I would appreciate it if the Commission would focus on the WalMarts and mega-industrial "farms." It is the complexity of THOSE supply processes that really are causing me the most fear for my health and that of my family and friends.

Thank you,
Linda Saffell
