Subject: Regulation #2777 2-160 Milk Sanitation

Message:

PLEASE reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation. This is not the way for the State to handle food safety - it is overstepping and directly insulting the intelligence of citizens to make informed decisions about their food sources. I am a Democrat, but I do not believe that more govt regulation is a good thing. Micro-management of small family farms is not the way to ensure our safety. Larger scale farm operations are more complex, problems are more abundant and have much more far-reaching impacts, and we have no direct meaningful recourse if there is a problem. The regulation needs to focus on those operations. Regulation #2777 has the ability to put many small family farms out of business and it takes away our rights and options as consumers. Small family farms are not causing the food safety problems our nation is experiencing. Please do not punish all farmers for the irresponsible farming practices of large-scale factory farms.
