Subject: proposed reg. #2777 Milk Sanitation

Message:

Dear Sirs: I respectfully request that you refrain from enacting Regulation #2777 Milk Sanitation. I am a Lancaster County resident and purchase raw milk from a neighbor farmer. We are members of CARE and operate under very strict sanitation regulations. Should there be a breach, we would very quickly shut down that operation until such time as the problem was solved. We have multiple options for purchases and that fact helps keep all our producers "on their toes" to stay in business. I realize that there is a need for regulation that results in a safe end product, but regulating methods and procedures should be left to the processes used by the producers. Please do not micro-manage our private industry. On a personal note, I have been unable to drink commercially produced milk most of my life. It is delightful to be able to enjoy milk again. Thank you for your consideration. Shirley Mertz Lititz, PA
