Subject: regulation #2777

My name is Albert C Burns, I am a raw milk consumer and I respectfully request that you reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation. I am an intelligent, discriminating consumer and do not need protection from my farmer-neighbor or local market or store. If they provide a unsatisfactory product or fail to appropriately correct a problem they will be out of business quickly. At that level , State regulation does not and cannot provide a higher level policing; every consumer policies that suppliers with every transaction and has direct enforcement options. Where we need government involvement is where the suppliers or markets are no longer our neighbors but rather corporations created by the State. Food safety is not size neutral. Larger operations are more complex, problems have much more far-reaching impacts and we have no direct meaningful recourse if there is a problem. The regulation needs to focus on those operations.

Although some regulations on this latter group are necessary, the regulation could be much simpler if they were performance standards, requiring that the end product achieves a desired result. How that result is achieved is the producer's responsibility, not the State's. That would result in the State's role being to test for compliance , a function that could be easily be contracted out, rather than inserting itself in micromanaging the operation. Please reject these regulations. Albert C Burns # 65279
