Subject: Please Reject "Final Regulation #2-160 (IRRC #2777): Milk Sanitation"

RECEIVED
IRRC

2010 OCT -5 A 9 05

Hello IRRC,

My name is Bernie Naskret and I am a raw milk consumer—I am unable to drink pasteurized milk because of severe allergic reactions!

Please reject the Pennsylvania Dept. of Agriculture's (PDA) proposed "Final Regulation #2-160 (IRRC #2777): "Milk Sanitation."

To me, the decision-making process that the PDA followed in coming up with the proposed final regulations regarding raw milk sanitation—as outlined in the September, 30, 2010, letter from PASA's Brian Snyder to the PDA and IRRC—shows arrogance, un-cooperation and/or incompetence by PDA's management! How can we expect to have the best, safest product at the best price when all parties involved are not invited to share their concerns!

As a taxpayer, I don't want government employees making decisions on my behalf based on a "shove-it-down-your-throat" management style—that's not the process that leads to optimal decisions.

Please reject the Regulation and start process again by incorporating the thinking of more of the raw milk producers and consumers!

Thank you!

Bernie Naskret
