Dear IRRC,

I am a raw milk supporter and I would like to urge you to DISAPPROVE of the proposed regulation 2777 Dept of Ag 2-160. Pennsylvania needs to lead the country in supporting the right to freely drink, purchase and sell raw milk by those who choose it.

Raw milk has nourished humans for thousands of years, and needs to be kept available and legal. Processed foods are not the answer to our health problems, and milk is no exception. Processing milk reduces nutrients and kills its naturally anti-pathogenic factors.

Small farms and producers, inherently accountable to their customers and statistically far safer than the huge producers, need your protection now more than ever. They are bastions of our shared American heritage.

Please SAY NO TO 2777. The country is watching.

Respectfully,
Beth Cowart
Minnesota
