**Subject:** proposed regulation #2777 Department of Agriculture 2-160

Dear Sirs and Madams,

How sad that I or anyone has to write this email to show our **disapproval** of proposed regulation #2777 Department of Agriculture 2-160.

It is such a shame that citizens of our once free country are fighting criminal aliens, terrorists and even processed food that hurts those who ingest it, have to spend time to fight to support a natural food...milk, in it's purest form,

If you really believed raw milk is an evil food that has to be controlled or stopped, then why are you not putting forth a bill that stops the fast food restaurants where it has been proven to harm humans? Is there hypocrisy afoot or is their lobbying and money getting to you?

This bill is just another step to reducing the freedoms of Americans and YOU know it.

You have the moral obligation to ensure the God given freedoms we have endowed to make our own choices about food.

Stop supporting the nanny state, it's embarrassing and revolting.
