My name is Brian Jaeger. I am a raw milk consumer and I respectfully request that you reject proposed regulation #2777 Department of Agriculture 2-160. Small farmers raising cows, grass fed on pasture and sunshine are not the ones who need oversight. The corporations who have thousands of cows crowded in a warehouse defecating on themselves are the ones who need watching. Their milk is contaminated from the get go. This regulation would impose unfair and unnecessary constraints on small farmers, restrictions which would have no impact on the quality of the milk, but whose costs might drive the small dairy farmers out of business. Please do not destroy the livelihoods of any more small farmers who produce the healthiest foods in the world. Although I reside in NJ, I know all too well that the beautiful state of PA is a model raw milk state for the rest of the nation, and what happens in PA could impact the rest of us real food lovers. Thank you for considering my request.
