**Subject:** Proposed Regulation #2777, Department of Agriculture 2-160

To Whom it May Concern:

Myself and family are raw milk consumers and I kindly ask you to DISAPPROVE proposed Regulation #2777. I do not feel that further government involvement is necessary to protect myself and family. We are informed consumers, and because we purchase from a small farm we are able to observe at any time the milking operation. If the product becomes unacceptable, or the conditions are unacceptable, we the consumers need only to cease purchasing which would eventually put the farmer out of business. I view the proposed regulation as excessive and placing unnecessary financial burden on our PA farmers. We want to keep our farmers in business.
