Subject: Regulation #2777

To Whom It May Concern,

I request that you vote to disapprove the proposed regulation #2777 coming up for a vote soon. For some of us with serious health issues, raw milk is one of the best foods we can eat and essential for our recovery.

Regulation #2777 is also going against those of us who want to support small organic family farms that are so necessary to the economic health of our land in its attempt to become more sustainable and people friendly.

Respectfully,
Christine Zecca
