Ladies & gentlemen,

Please hear the voice of the people regarding free access to healthy food, in particular, RAW MILK.

We are raw milk activists & consumers and have benefitted from free access to raw milk since childhood, for now over 50 years.

Please disapprove the unnecesary regulation #2777 Dept of Ag 2-160.

Leave the small businesses alone that would be very adversely affected by this. Government should not exist to make the backbone of American business mired down with intrusive regulation, all under the guise of more "safety".

Thank you for hearing and heeding the voice of the consumer, the people, and not special interests or large corporations who do so much to put the "little guy" out of business

Sincerely,  
Constance Meyer RN, BSN
