Subject: proposed regulation #2777 Department of Agriculture 2-160

As a citizen of Pennsylvania and a strong supporter of individual rights, I would as that you Disapprove proposed regulation #2777 Department of Agriculture 2-160 and preserve Pennsylvania as a model state for freedom for consumers who are endeavoring to maintain a healthy and natural diet.

The benefit to raw foods actually goes beyond individual rights and if they were used on a broader scale would in fact help relieve the load of PA hospitals that are overloaded with patients suffering from many diverse ailments resulting from the processed food lifestyle that we as a society encourage.

Again, I would encourage you to consider that true liberty is having freedom to do as you please as long as you are bringing no harm to anyone other than yourself. Please vote to disapprove this oppressive regulation that seeks to deny myself and my family access to truly healthy dairy products.

Respectfully
Daniel Kocher
