Subject: Raw Milk Regulation

To whom it may concern,

We are writing to request that the proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation be rejected. We do not need the government to protect us from our local farmer. We have received pure quality milk for the past five years and further government controls are not going to improve quality or add value in any way!

Please reject this proposed bill.

Sincerely,

Dane and Shawna McClafin
