**Subject:** proposed regulation 2777

I am writing to encourage DIASPPROVAL of proposed regulation 2777 Department of Agriculture 2-160 because I believe it would increase the difficulty of raw milk producers in the state to make a living. I believe that raw milk is a valuable nutrient and that we should be promoting consumption of raw milk rather than making it harder to produce raw milk. Although I don't live in Pennsylvania, I care what happens there because Pennsylvania's approach is often replicated in other states.
