Subject: STOP Regulation #2777 Department of Agriculture 2-160

RECEIVED
IRRC

2010 OCT -5 A 9 04

Dear Independent Regulatory Review Commission:

Please use the sense of our forefathers like Thomas Jefferson.

Raw milk saved my life--gave me my health back when I couldn't feel my limbs. Now I am strong and healthy. The store milk and other processed foods only made me sicker.

I have learned too much about the problems of processing our food.

My raw milk comes from a bio-diverse farm where it is tested regularly. It tastes a million times better than processed milk.

Please let us return to common sense, respect for nature and God-given rights.

It should be self-evident that naturally healthy food makes healthy bodies. There is an order in nature, which cannot ultimately be ignored.

To punish small farmers and consumers is un-American, tyrannical and the end of individual freedom.

To try to change the wisdom of eons is plain evil.

Please use your hearts and minds when you think about this bill.

Vote against it. It is deceptive on every level.

Sincerely,

Gina Alianiello
Littleton, CO
