Subject: #2777 Department of Agriculture 2-160

Dear IRRC Commission-

I am writing to ask that you please reject regulation #2777 Department of Agriculture 2-160 on Milk Sanitation.

Since my heart attack last year, I have become committed to buying fresh, locally produced, pasture-fed, organic meat, dairy, fruits, vegetables. Raw dairy is an important to my health. I make a point of knowing my food producers. Being local means they are held accountable. If any of my friends became ill and suspected our raw dairy source, I would know about it before the sun set.

It is important the regulations stay focused on food safety through testing and compliance of food products, rather than get entangled is regulating how food get raised and processed.

I applaud regulation to protect the general public from unsafe, mass-produced food. We/they need that protection. But I need my freedom to choose my food sources. It is important tome and my health.

Thank you,

Jack Moore
