I ask that you vote NO on regulation #2777 Department of Agriculture 2-160: Milk Sanitation.

This regulation is another attempt to eradicate small farmers. In order to preserve our right to choose our own food our government must stop imposing "Factory Farm standards" on small farmers.

As more and more regulation is passed targeting the small farmer, fewer small farmers can survive. Small farmers, practicing sustainable agriculture, grass feeding their dairy cows, raising their cows on pasture, without overcrowding, without hormones or antibiotics produce a much healthier product than the Factory Farm can ever hope to offer.

Please vote NO!
