Subject: proposed dairy reg. #2777

Dear Sirs: I am aware of proposed new subject dairy regulation. Though I am not a resident of your state I am concerned that this regulation if passed, will affect other states as well. This ruling seems to me to be another arrow in the quiver of big business to legislate small independent milk producers out of business. Is there not ample evidence nationwide that the general public is already fed up and overburdened with more and more needless regulation? If this proposed regulation is supposed to save lives I am sure that it would already be law. On the other hand if, it is a result of pressure from big corporations and politicians making yet another assault on the little guy to erase him from the competition, this new regulation needs to be very carefully weighed before passage. I wish to go on record as opposed to this move since it will surely have far reaching consequences. Respectfully, John W. Cooney
