Subject: Proposed regulation of raw milk

Dear IRRC legislators,

Although I am a long time resident of Texas, out of deep concern for the residents of Pennsylvania and your raw dairy producers, I wish to speak out in opposition to the proposed regulation #2777, Dept. of Agriculture 2-160. Many of your residents depend on raw milk and raw milk products for their health and for the health of their families and it is why they choose it over pasteurized dairy products. Numerous studies point to the vast benefits and healing properties that raw milk provides in strong contrast to negative effects of adulterated, and denatured, pasteurized milk. Please consider the detrimental effects that the passage of this legislation would inflict on your residents freedom of choice and freedom to produce and receive life and health giving products.

In Texas, we must purchase our raw dairy products privately or through cooperatives but at least we are able. I depend on my raw dairy farmers for all my dairy needs and they have been the KEY factor in healing my numerous health and digestive problems. I otherwise would not consume any dairy products (pasteurized) whatsoever. As it has a totally different and negative effect on my person (causing allergic reaction and debilitating fatigue). So with compassion and concern for all the individuals wishing freedom of choice to feed and nourish themselves in a manner they have determined, and for the health and well being of so many, please oppose this burdensome and freedom stripping legislation. Thanks for listening to a fellow citizen from far away.

Sincerely,

Julie Williams. Austin, Texas
