Subject: Dairy Regulation-Kindly reject proposed regulation #2777 Dept. of Ag. 2-160

INDEPENDENT REGULATORY
REVIEW COMMISSION

To Whom It May Concern,

Raw milk has kept people healthy for years. I know our family will not drink milk if raw milk is not available. I believe that the majority of raw milk providers take excellent care to keep their product healthy. I think that is called wise business practice. I will not feed my family anything that makes them sick.

Performance standards are what is needed. The proposed regulation #277 DOA 2-160 is excessive. Please do not support it. It must be rejected. Thanks so much.
