**Subject:** raw milk does a body good

Dear IRRC,

Please leave the Food Freedom of native Pennsylvanians alone, and do not let nannystate bureacrats dictate on matters that should be between the consumers and the farmers they choose to do business with.

Please vote no on proposed regulation #2777 Department of Agriculture 2-160.

While you are at it, maybe if the state budget is in crisis, some positions at the Pennsylvania Department of Agriculture might be cut to restore the great commonwealth of Pennsylvania to solvency? Pick a department which would bring the most joy to taxpayers nationwide.

Milk is not an infectious disease, and almost all bacteria are good for the human body. Opportunistic microbes cause problems when the good bacteria are suppressed.

Here is some homework for the bureacrats who do not follow current research:  
"Gut and Psychology Syndrome" by Dr. Natasha Campbell-McBride "Breaking the Vicious Cycle" by Elaine Gottschall "The Germ that Causes Cancer" by Douglas Kaufmann

Cheers!

Michael Walsh
