Subject: proposed regulation #2777

As a raw milk consumer and supporter, I urge you to NOT approve proposed regulation #2777 Department of Agriculture 2-160. This regulation will place an unnecessary burden on raw milk producers, possibly putting some of them out of business, while adding yet another layer of bureaucratic red tape and expense that will be paid for by the taxpayers of Pennsylvania and for which they will receive little or nothing in return. Raw milk is health, the system is working fine as it is, and there is not need or justification for regulation #2777. Vote NO on this regulation!

Sincerely,
Richard Newman
