**Subject:** vote to DISAPPROVE Please vote to disapprove the proposed regulation #2777 Department of Agriculture 2-160.

Raw milk is very important to me and my family as it has improved our health. Pasteurized milk lacks the enzymes and probiotics of real milk.

Please don't over regulate the small farmers who are doing good by the environment, and able to make an honest living. In this economy you should be doing more to enable more raw milk producers to start up. Passing this would cause many of them to be shut down.

Pennsylvania could have a great model for other states like mine to follow.
