Subject: DISAPPROVE proposed regulation #2777 Department of Agriculture 2-160.

I am a Raw milk activist in my home state of CA who has supported raw dairies and products for the past few years, since they literally saved the life of my son and I. We became intolerant to pastuerized dairy and went for years not knowing what was causing havoc with our health. My seven year son was on five different prescription medications for asthma and sinus illnesses. I was always sick and my immune system collapsed. After a diagnosis of milk allergies, our lives changed drastically as we could no longer eat food with even the smallest amounts of milk or butter in them.

We eventually were able to tolerate the raw milk in small doses gradually working up to full glasses on a daily basis. My son is completely recovered with no asthma symptoms and I have resumed my full time job.

We support our dairy farmers in any way we can to keep these options open to the public. Pennsylvania is one of the biggest supporters of raw dairy and the entire nation will be watching how you vote on this. Please vote NO on #2777 DOA 2-160

Sincerely,
Shea Smith
