My name is Shirley Hunsberger. As a raw milk consumer in two states for almost all of my very healthy 67 years (which I greatly attribute to raw milk), I respectfully request that you reject proposed regulation #2777 Department of Agriculture 2-160: Milk Sanitation. I am an intelligent, discriminating consumer and do not need protection from my neighboring farmers or local market or store. If they provide an unsatisfactory product they will be out of business quickly. Regulation needs to focus on larger, more complex operations where we have no direct meaningful recourse if there is a problem. The proposed regulations do not protect the public health. Instead, they subject raw milk producers to unnecessary expenses that will make it financially difficult to continue in business and will rob me of my right to food choices that I know have provided me, my husband, my sister aged 85, my children and grandchildren much appreciated health.

Again, I view the proposed regulation as excessive and unnecessary and I care about this issue because PA is a model raw milk state for the rest of the nation and can eventually impact other states. These flaws warrant that the proposed regulation be rejected.

Thank you for your attention to my concerns.
