Dear PDA,

2009 SEP 28 AM 10:00

Regarding raw milk legislation, I would like to urge you to exempt the direct sale from producer to consumer from your regulations because I bring \$ to your state economy when I buy from PA farmers. Also, direct transactions DO NOT impact the public's health or safety and its my God-given, constitutional right to private contract,

other states that allow for the unlicensed sale of raw milk have a good safety record. It is not reasonable to use state resources to test things that don't cause illness in people. Only pathogens that cause illness in humans should be tested for. We need less Gov NOT MORE GOV!

DAN Kremer
