ENVIRONMENTAL QUALITY BOARD

INDEPENDENT REGULATORY

Dear Representative: Environmental Quality Board -

I am writing to urge you to require a minimum of 100 foot forested buffers on all Pennsylvania streams.

Protecting our environment protects our citizens - you, me, all of us - from illness and disease. Isn't there enough cancer in the United States today? Aren't we a humane enough country to try to scale back environmental devastation and heal our planet and ourselves?

Not only are forested buffers good for the environment, they are also good for the economy, reducing pollution and flooding and increasing property values.

Please do the right thing.

Sincerely,

Christina Zani
