Newtown PA 18940

TO ENVIRONMENTAL QUALITY BOARD:

I feel that you should ~~not~~ make the 100 foot forested buffers on all Pennsylvania streams. FORESTED BUFFERS are good for the environment and the economy because they reduce pollution and flooding and increase property values. Streams and are ~~safe~~ great location for hiking trails. reduced treatment costs are an important byproduct of clean streams, and that is important in these difficult times. We need a minimum 100 foot forested buffers on all streams in PA.
