INDEPENDENT REGULATORY
REVIEW COMMISSION

- Forested Buffers are good for the environment and the economy because they reduce pollution and flooding and increase property values.
- We need minimum 100 foot forested buffers on all streams in PA!
- Clean water is imperative to our health. It is not something that we can or will compromise on. We have small children in this household whose health is our first priority. This is not the first time that our water has been contaminated. We need to take action to insure that it is the last.
