

Environmental Quality Board:

RECEIVED

DEC - 9 REC'D

INDEPENDENT REGULATORY  
REVIEW COMMISSION

Proactive steps to protect our waterways are essential now. I urge you to institute mandatory buffer zones of 100 feet from streams for all new construction and development.

As a suburban homeowner I am taking steps to ensure that my property does not contribute to run off of water by reducing paved surfaces thereon. I enjoy and fish the rivers and streams of Pennsylvania and want to keep them clean and habitable for the fish and other wildlife for future generations.
