DEC - 9 REC'D

Nov. 19, 2009

INDEPENDENT REGULATORY  
REVIEW COMMISSION

To: Dept of Environmental Quality Board

We are writing to request buffers  
to protect our streams & communities.

They are good for the environment  
and the economy because they reduce  
pollution and flooding and increase  
property values.

We need a minimum 100 feet forested  
buffers on all streams in PA.

Clear water is very important to all our  
health and these buffers are an  
important step in keeping our streams  
clean.
