To Whom It May Concern:

I wanted to communicate my concerns regarding the impact of development on our streams and water supply.

Many risks (e.g., pollution, flooding and damage, erosion, etc.) have emerged due to development near the edge of streams. Mandatory Forested Buffers is the appropriate solution to mitigate these risks. We need minimum 100-foot forested buffers on all streams in Pennsylvania.

I wish to protect our water supply now and for future generations.

Donna White

Sincerely,
Donna White
