INDEPENDENT REGULATORY  
REVIEW COMMISSION

Please place forested  
Buffers 100 feet or more on  
all streams and waterway  
in PA. Forested buffers are  
good for the environment  
and the economy because  
they reduce pollution and  
flooding and increase  
property values. Our  
environment must be  
protected if we are to  
have a future at all.  
Our children deserve to  
have a safe environment
