REVIEW COMMISSION

Dear EQB,

Please require the minimum 100 ft. forested buffers on all Pennsylvania streams! Forested buffers are good for the environment and the economy because they reduce pollution, flooding and increase property values. Human beings are 70% water, fresh water runs along our spinal column and the rest of our fluids are saline. If we don't require clean water acts, we will cease to survive. The clean water act of Pennsylvania is making moral decisions for you, please listen.

ENVIRONMENTAL QUALITY BOARD

Sincerely,  
Frances Summilion
