To Whom it May Concern:

I am writing this letter because there needs to be a required Forested Buffer program. These buffers are extremely important to the community. They help reduce pollution, flooding and stream erosion. Forested Buffers are also economic in the sense that they increase property values and lower treatment costs for drinking water. To attain this there needs to be a minimum 100 foot forested buffers on all streams in PA. This issue is very important to me, the decline of the environment greatly affects every person. Retaining clean water is most important to me because it affects my family and myself. To ensure a healthy community there needs to be a strong emphasis on clean water and the environment.

Thank you for your time,  
Isabel Sierra
