REVIEW COMMISSION

Dear EQB,

I am 15 I go to Mariana Bracetti Academy and I believe think we should have clean water. I don't want to drink out of a dirty river. I heard that the dirtier the water the higher the water bill for our families in Philadelphia. This is why we need buffers to protect our streams and our communities. We need atleast 100 foot forested buffers on all Pennsylvania streams. Forested buffers are good for the environment and economy because they reduce pollution and flooding and increase property values. We need minimum 100-foot forested buffers on all of the streams in the PA. Thank you for reading my request and I hope you take this up into consideration.

Sincerely,

James Moore
