DEC - 9 REC'D

Dear Environmental Quality Board,

INDEPENDENT REGULATORY
REVIEW COMMISSION

I think you should require minimum 100 foot forested buffers on all Pennsylvania streams. For the reason clean water is very important to our community. So we can use. For example, to drink for our babies, and to clean our babies. Also for our environment. So we can feed our plants. We really need streams, they are important for our environment too. We need to reduce the pollution that our water contains. We also need clean water for animals like forest animals. They need water to survive just like a stream of water. Please require 100 foot buffer zone on all streams in Pennsylvania. I will appreciate it also, the animals, mother earth, and our environment.

RECEIVED

ENVIRONMENTAL QUALITY BOARD

Sincerely,
