ENVIRONMENTAL QUALITY BOARD

protecting our water ways  
is so important, when I was  
a child our streams & water  
ways were so much cleaner, now  
I see polluted streams & creeks  
Floods, where they never were.  
We need to make a concerted effort  
to protect streams & properties.  
Please pass the 100 ft. stream buffers  
mandatory, if not for us our  
grand children, we have lost so  
much already, that I see I've  
watched the erosion of our streams  
and creeks. Please help us today!
