I read the certification. I am concerned that the language is too broad in nature, and could easily open you up to exposure beyond your traditional responsibility. Record drawings are always prepared by information supplied by the Contractor. Furthermore, it is very unusual to have an exact match between the record drawings and the redline drawings.

Please let me know if I can be of additional assistance.

Is there any minor mitigations that could be made to this language to allow us to sign off and retain coverage?
