

2785.

Mr. IRRC Member James Smith,

RECEIVED
IRRC

2010 AUG 11 A 9:37

I'm asking you to please strike down the
Canine Health Boards Regulations.

I just got off the phone with an engineer
with Morton Buildings. They are saying &
quoting me a price of \$65,000 - \$75,000 just
for the HVAC equipment which includes 16 ton
unit (4-4 ton units) duct work to each inside primary
enclosure, this does not include lighting.

Till you figure labor for installation they
said figure between \$100,000 + \$25,000. My
current kennel was built and fitted for less than
\$20,000 now I'm expected to spend 5x that just
to try to comply. Morton can't guarantee to meet
the Amonica requirements because there is no
data available. My electric usage will go from
\$350/m. to over \$2000/m. There is no way I
will be able to comply with this.

Thank-you.

Jerry Kreider
