

Dear Mr. Smith

2785

My name is Dan Lapp. I'm a licensed commercial dog breeder in Montgomery, PA.

I have a ~~problem~~ problem with some of the regulations you will discuss in the Aug 19th meeting.

I have radiant hot water heat in the floor of my Kennel. So far it has worked perfectly, having to have another source just doesn't make sense.

#2

Being a Naturally Ventilated building I have fresh air exchange all the time. Also after renovating Kennel building after ~~last~~ ^{last} regulations ^{Oct. 2008} passed, I have no more credit to put in a huge Tunnel fan system. plus dehumidifier, AC, another heat source, etc. would be a financial problem & would put me out of business.

Please vote no

Sincerely, Dan
