Regulations email

Dear Acting Secretary Redding,,

With fall upon us and winter just around the corner, I am working hard to install heating in my home. This heat will keep me and my family warm this winter. As you turn on your heat please consider those who are not only unable to turn on the heat, but have no voice to tell others about the temperatures they are forced to endure. While we are able to turn on a fan, air conditioner, or heater at our convenience, dogs are not so lucky.

I am writing in support of the proposed regulations to: implement new standards to provide auxillary ventilation so that the temperature does not exceed 85 degrees or fall elow 50 degrees and implement ventilation requirements that will ensure that fresh air is continually passed throughout the kennels to reduce disease.

Thank you for your attention to this very important matter.

Lynette Luke
