Dear Canine Health Board

This is a request to consider an alternative flooring for the porch of my kennel.

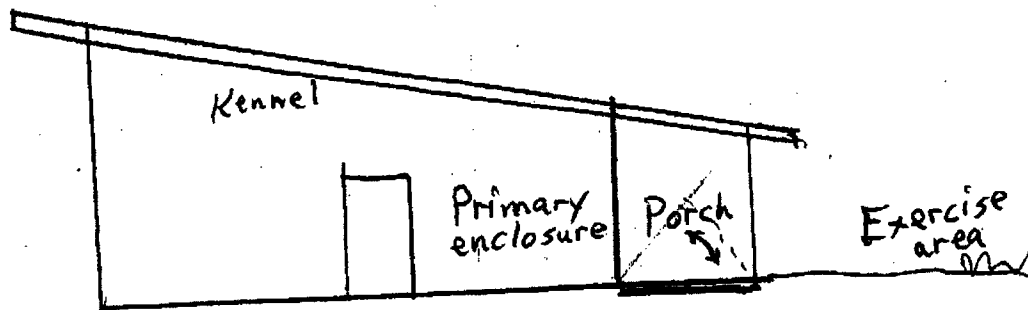

I have solid flooring in my primary enclosures and stone and grass exercise areas with free access. Directly outside the primary enclosure and between primary enclosure and exercise area I have a porch with plastic slotted flooring. The reason for this is to allow dirt and small stones to fall off of the dogs feet before entering primary enclosure.

I can assure you that this is very helpful in keeping a considerable amount of dirt outside, as my old kennel had solid porch floors. over

Further, I have this plastic porch floor hinged to lift up for clean out.

This flooring was purchased from Raber kennel and Supplies in Ohio. If you are familiar with this flooring and can approve this use please reply in writing.

If you will need to see a sample I will ship or deliver a peice to you. Thank You  
Melvin

### HEAVY DUTY KENNEL FLOOR...

- 2' x 8' size
- 2 1/2" high.
- 1 1/2" x 2 1/2" holes.
- Easy setup for double deck.
- Use 2" abs plastic pipe for legs.
- You furnish pipe to your length.
