i have written to the Dept of Agriculture, Bureau of Dog Law Enforcement and ask you also to establish and enforce laws and rules that will care for the health and welfare of these, the most helpless among us. That includes reasonable habitats, temperature limits, lighting requirements and medical care. It is not a BUSINESS to deal with the flesh and blood of any living thing and you, and I must protect them as we protect humans who are helpless. Sincerely Joan Celebre Dragonetti M>D>
